Grasslands FFA Plans Banquet

Lamar Hollinger, of Denver R1, will be one of the guests present at the first annual FFA Parent - Son Banquet of the Grassland Chapter, Future Farmers of America of Garden Spot High School, New Holland.

LAMAR HOLLINGER

Lamar, who was the winner of the 1960 National FFA Public Speaking Contest held at Kansas City, Mo., will present his prize winning talk on conservation.

The Banquet will be held on Friday, March 25th in the cafeteria of the Garden Spot High School. Included on the program will be the presentation of awards. Four local men will receive the Honorary Chapter Farmer Degree for their interest and effort on behalf of the Vocational Agriculture department and the FFA. The men receiving this honorary degree are: George C. Delp, President of the New Holland Machine Company; A. B. C. Groff, owner of the Groff John Deere Agency of New Holland; Robert P. Simon, Supervising principal of the Eastern Lancaster County Joint School District; and Ivan S. Witmer, President of the Eastern Lancaster County Joint High School Board.

Twelve Certificates of Appreciation awards will also be presented to men in the area expressing the appreciation of the boys in the FFA for the contributions of these men to the success of the Vocational Agriculture program this year

TREATING TOBACCO SEED with Silver Nitrate solu- on the farm of Harold B. Endslow, Marietta R1 is ociate County Agent Harry Sloat. The solution will help rol wildfire in the tobacco bed, but since it is a poison equires caution in handling. Here Sloat is giving the seed first rinsing after the three minute soaking required to he job. —LF PHOTO

ounty Agents Treat Tobacco Seed o Help Control Wildfire Disease

obacco Wildfire disease a setback on some Lan- er County farms this k as representatives of extension service clean- and treated 125 batches obacco seed at four dif- nt locations.

ere Winthrop Merriam, stant county agent, and old Endslow, president he Lancaster County To co Growers Assn. discuss old seed blower used to v the chaff and light se- out of the good seed, in dslow's tobacco cellar at rietta R1

After the seed had been claned it was given a bath in a solution of Silver Nitrate by Associate County Agent Harry Sloat.

"Will that really keep wildfire out of my tobacco bed?" one farmer asked.

"Well, it will kill the spores on the seed, but they could blow out from your shed onto the bed. But this is good insurance." Sloat answered.

Sloat cautioned the farmers that even though the seed received one washing after treatment, it should be washed again before being dried because Silver Nitrate is a deadly poison.

4-H Holstein Club Date Announced

The reorganizational meeting of the Lancaster County 4-H Holstein Club will be held March 24 at 7:30 p.m., at the Farm Bureau Building, Dillerville Road, Lancaster.

According to Victor Plastow, Associate County Agent, this is one of the largest clubs in the county with almost 90 members last year.

In addition to election of officers for the coming year the program will include a recently released moving picture on detection and treatment of mastitis in dairy cattle.

All interested youth and parents are urged to attend the meeting.

Three Watershed Meetings Are Scheduled By SCD

The Lancaster County Soil Conservation District has announced programs for three watershed meetings during March. Two of the meetings are co-sponsored by other agricultural groups within the county while the third one is to be held in cooperation with the Lebanon County SCD.

First of the three meetings is scheduled to be held in the Donegal High School on March 22 at 7:30 p.m. The Witness Oak Chapter FFA, co-sponsors of the meeting will furnish the entertainment and present several short talks on conservation.

A panel, moderated by Grant Miller, teacher of Vocational Agriculture at Donegal high school, will discuss observations they have made concerning conservation. Panel members will be Hary Zerphy, Leroy Heisey, Richard Yuninger, and Emory Herr, all farmers in the county. John Melhorn, associate Township Direstor of SCD, is general chairman for the event.

Sharing the sponsorship of the second watershed conference will be the Lampeter Young Farmers Association. On the panel at the March 24 meet will be Em-

Tree Seedlings Still Available

Harrisburg — Secretary of Forests and Waters Maurice K. Goddard said today that the deadline for procuring seedlings from State Forest Tree Nurseries has been extended to March 21 in order for the nurseries to dispose of as much existing stock as possible. Original deadline was February 15.

Species available are: White Pine, European Larch, Austrian Pine. Goddard said that the White Pine, is particular, is "an excellent three - year stock."

Interested land owners may place orders for seedlings and get planting information from John Kitch, service forester, Reinholds R1.

Officers Elected By Three 4-H CommunityClubs

Three community 4-H Clubs, one county club and the county 4-H leaders council held election of officers during the week.

At a meeting of the 10 member executive board of leaders council on Monday night, Mrs. Harold Fry, of Stevens R1 was elected president of that group. Mrs. Fry, secretary-treasurer last year, succeeds Victor Longenecker, the first year president.

Other officers elected were Richard Lefever, Quarryville R1, vice president, and Mrs. Jean Singer Thomas, Manheim, Secretary-Treasurer.

FIVE - DAY WEATHER FORECAST

Saturday - Wednesday

Temperatures will average four to eight degrees below normal for the next five days. Normal temperatures for this time of year range from a low of 33 at night to a high of 53 in the afternoon. Rather cold over the weekend followed by a rising trend. Some rain likely about Tuesday. Precipitation during the past week was .56 inch of which about four inches was snow and the rest rain.

At Lancaster Yards

Stockers, Feeders Strong

James E. O'Hara,
In Charge, Market News Branch

CATTLE: Receipts will total about 4250 head or about 600 head more than last week. Supply includes about 45 per cent slaughter steers and about 45 per cent stockers and feeders. Trading was slow on slaughter steers but moderately active on all other classes.

Compared with last week's close, slaughter steers were steady to 50 lower with most decline on Good grade Average Cutter and better grades of cows sold 75 lower. Canners and low Cutters were 50 lower Utility and Commercial bulls held steady, with Good grade fed bulls 25 lower. Stockers and feeders were strong.

A lot Prime grade slaughter steers 1114 lbs. made 30.-50 and a load mostly Prime 1219 lbs scored 30 25, several loads and lots average to high Choice 1097-1150 lbs. brought 29 50 - 30 00. The bulk of the Choice grade steers weighing up to 1425 lbs. ranged from 27 50-29.00, with Good to low Choice at 24 50-27 50.

Several lots Good to high Choice 885-1127 lb. heifers sold at 23 50-27 50.

Cutter and Utility cows made 16 00-19.00, Commercial cows 18 25- 19 00, Canners and low Cutters 14 00-16.00. Utility and Commercial bulls brought 20.00-23 -50, and Good grade fed bulls made 23.50-26 00, but mostly 25.50 down.

Good and Choice 600-800 lb. stock steers managed 26.-50-30 00, and a lot high Choice 561 lbs. reached 31.-50, while Medium and Good made 23.00-27 50. Good and Choice 800-1050 lb. feeder steers made 25.00-29 00 and Medium and Good sold at 22-26. A few lots Good grade stock calves brought 28.00-30.00.

CALVES: Receipts will total about 750 head or about 200 head more than a week ago. Choice and Prime vealers sold 1 00 lower, but Good grade and below sold 2.00 lower. Trading was moderately active Good and Choice vealers ranged from 29-36.00 with Choice and Prime at 36 00-41 00, early in the week they sold up to 42.00 with a few at 43 00 and 44., Standard and low Good made 21 00-28 00 with Utility selling down to 16.00.

HOGS: Receipts will total 2300 head or about 1000 more than a week ago. This is the first time in 11 months that receipts have totaled more than 2100 head. Trading was moderately active on barrows and gilts sold steady but sales on 350 head Wednesday were 25-50 higher than the close of the previous week. Sows were 1.00 higher. U. S. 1-3 grade 190-230 lb barrows and gilts were 15 75-16.50, closing at 16.25-16 75. Hogs more uniform for weight and grade made 16 50-17.50 230-250 lb. butchers sold at 15 25-16 00. Few lots 130-160 lb. hogs brought 13 00-14 00. 300-600 lb. sows were 10 00-13 00.

SHEEP. Receipts will total about 200 head or about 50 head more than a weed ago. The supply included several lots slaughter lambs. Trading was moderately active Wooled slaughter lambs brought 50c more. Good and Choice 75-105 lb slaughter lambs sold at 21 00-24.50, Utility & low Good 16.50-21.50 Few lots Good grade Spring lambs 73-90 lbs. brought 27 00-29.-00, and a lot Choice 85 lbs sold at 30 00.

BUYING BABY CLOTHES

Well-made baby clothes give comfort and good service, says Mrs Mae B. Barton, Penn State extension clothing specialist. When buying, select garments with smooth, flat seams and simple fastenings. Snaps, tape ties, and gripper fasteners are good choices. However, grippers frequently become damaged after long use and are hard to replace Buttons often break in laundering or the baby may pull them off.

Chicago Cattle

Prime Highest Since Last May

Cattle—Additional heavy snow and resulting hazardous road conditions over much of the midwest continued to hold receipts to very moderate proportions. Local supplies were 3 per cent below last week and smallest since April Consist of receipts locally little changed Stockers and vealers and feeders very scarce. Percentage prime in slaughter steer supply little changed from 8 per cent last week.

Steer and heifer prices declined Monday but this decline was erased in most instances by stronger trends the following market days as receipts were curtailed Choice and prime slaughter steers steady to 50 higher, good and below steady to 50 lower but mostly steady to weak with general steer trade highest since September. Vealers steady, stockers and feeders slow and steady to weak.

Load prime 1225 lb. slaughter steers 33 highest since last May, six loads prime 1150-1375 lb. steers 32.50, high choice and prime steers 1450 lbs. down largely 29.50 -32 25, most choice steers at 26.75-30. Most good steers 24-26 50, mixed standard and low good 21-24 Load prime mixed steers and heifers 30 75. Prime 1130 lb. heifers 29.50 highest since last July.

Few choice vealers 32-34, good 30-32, standard 23-30.

Good and mixed, good and choice 800-975 lb. feeding steers 25-26.75, load medium 820 lbs. 24, load good 650 lb stock steers 25 50.

New Holland

Prices Firm On Heavy Run

A fairly heavy run of cattle failed to depress the market appreciably at New Holland this week. The Mar 17 sale had receipts of 1329 cattle and 270 calves.

Trading was moderately active Choice grade slaughter steers were steady to 25 higher. Good grade and below steady to 25 lower Cows were 25 to 50 lower Bulls steady with lesser quality considered.

Several lots of choice and prime 1080 to 1104 lb. slaughter steers 31-31 75. Bulk of choice grade cattle 27-30 Good to low choice 24-27 50. Standard 21-23.75

Good and choice 700 to 960 lb heifers 23 10 25 60 Standard 19 23.

Utility and commercial cows 16 25-19 35, few up to 19.50 Canners and low cutters 14 50-16.25. Utility and commercial bulls 21 24 Good grade fed bulls 23 50-25 50.

Few lots medium and good 720-884 lb feeder steers 25.25. Few lots 558-591 lb stock steers 22 60-24.60

In the calf market trading was moderately active Vealers unevenly steady In spots 1 00 lower Good to choice vealers 30-38.50. A few choice 39-40.50. Few Prime 41 50-43 50. Standard and low good 24 30. Utility and low standard 18-24.

The March 16 dairy cattle sale had receipts of 105 cows 10 bulls and six heifers Fresh cows showing type and milk steady to strong All other kinds steady.

Fresh cows, Holstein $350-440, Guernsey - $200-275, others - $200-275 Stock bulls - $110-185, stock heifers $100-140

The March 14 horse sale had receipts of 230 horses and mules. All kinds sold steady.

Mules, pair $275-480, single 130-170, ponies - $75-120, Riding horses - $120-200 Driving horses - $125-280 killers - 9½-10 cents

Delmarva - Georgia
Prices are Firm Supplies Down

Delmarva reported at farm prices ranging from 17.30 to 19.20 for 816,100 head for the 24 hour period ending 10:30 Friday morning.

Estimated slaughter by Delmarva processors for the week end is 597,000 head as compared to the 634,000 head last week end. Oferings and supplies were fully adequate for the only fair demand.

The Delmarva broiler-fed ratio for the week ending March 11 was back down the four points it gained the previous week.

The ratio was 4.0 with mash costing $92.04 per ton. This compares to the ratio a year ago at 3.7 with mash costing 98 22 and broilers at an average of 18.22.

Georgia reported prices of 17 to 18.6 for 1,705.000 head at the farm during the 24 hour period ending 10:30 Friday morning.

Estimated slaughter by Georgia processors for the week end is 1,907.000 head. No comparison was made with the previous week when most plants were closed by snow.

CARE OF SEEDLINGS

Tree seedlings must be kept moist from the time they leave the nursery until they are planted, explains Walter Simonds, Penn State extension forester. He emphasizes that a good root system is essential to successful planting, but if the roots dry out rapidly they will be injured.

COLOR GIVES CLUE

The intensity of the color of a green vegetable is a clue to its food value, states Louise W. Hamilton, Penn State extension nutrition specialist. In general, the greener the vegetable the richer it is in vitamins and minerals

Last year some 4 million visits were made to the ski areas on national forests. Considering growing interest in the sport, U. S. Forest Service recreation experts predict 4½ million visits will be made during this winter and spring season.

FROM WHERE WE STAND -

Let's All Eat Better Breakfasts

Some wag was once heard to say that a moth in a cocoon was the only animal he knew who could eat his way out of trouble.

Now along comes a group of business men in Missouri with the idea that we can eat our way out of some of our over supply of foodstuffs in this country.

The Chamber of Commerce in the town of Poplar Bluff, Butler county, Missouri is sponsoring a campaign for "Better Breakfasts".

A hotel dining room full of hungry school youngsters and their parents were treated to a model nutritious breakfast planned by the county home agent. These children received campaign kits of information about well balanced breakfasts which they took back to their schoolrooms.

There will even be a contest with prizes for the four boys and girls who do the best job of telling their classmates about the advantages of eating good breakfasts.

From where we stand, this looks like one of the better suggestions to be proposed for easing the surplus situation.

Think of the possibilities' If only one person in every 175 in this country would eat only one more egg for breakfast for one week almost seven million eggs would be taken off the storage lists. And a parallel could be drawn for all the other farm commodities.

Furthermore, nutritionists have told us again and again that a good breakfast is essential for good health.

But then what about that other big American problem—overweight? We know that a given amount of calories will produce a given amount of energy, and if that energy is not burned up by the body it will be stored by the body in the form of fat.

Missing breakfast is one of the best ways to trigger the body into laying on surplus tissue. After an all night fast the body is in need of energy. If no food, or only a small amount, is consumed two things happen.

First the energy level dips low. The capacity of the body to do work is lowered. The person becomes lethargic and does less work or works at a more leisurely pace burning up less of the stored energy.

In the second place the body becomes so depraved by the next meal that there is a tendancy to overeat with resultant lethargy later in the day, and a vicious cycle develops.

When conservative estimates of the high school students in this country of bulging food bins not getting a properly balanced diet runs as high as 20%, we feel it is time for all farmers to get behind a movement such as the one in Missouri. Better breakfasts are the first step toward a better day.

At least that how it looks from where we stand.

OLD WIVES' TALES

Not so very long ago, as the American Meat Institute recalls, it was widely believed that night air was dangerous for small children.

This, of course, was an old wives' tale without foundation in fact. And there used to be many other commonly held ideas which were equally foolish and dangerous.

One was that pork was an unhealthy food. Indeed, in the old days it was a common practice to totally eliminate meat from the diet in cases of illness.

Nutritional science has banished that notion. Pork, we now know is one of the most valuable food sources of thiamine and is rich in other B vitamins and in various essential minerals.

And meat of one kind or another, the scientist tells us, is needed by virtually everyone, every day, and in substantial quantities. That's true whether a person be ill or the picture of health. Meat's high protein content makes it invaluable, in fact in convalescence. It is a prime source of both physical and mental vigor.

Old wives' tales often die hard. But like all superstitions and illusions, the sooner we rid our minds of them the better.

THIS WEEK

—In Washington

With Clinton Davidson

New Farm Program

Congress at the half waygrams commodity by commark for this session is pretty well agreed this week that it will not pass a general farm bill this year, despite recommendations by President Eisenhower that it do so.

Legislators from farming areas, however, are making a start toward the kind of farm legislation they hope the next Congress will consider, beginning in January of next year

Some twenty-odd congressmen have introduced identical bills which, if enacted would place primary responsibility upon farmer elected representatives for initiating and developing new programs commodity by commodity

The House Agriculture Committee plans to hold hearings through the spring on bills, but not to push for a vote on them by Congress this year. The main feature is that they would permit farmers to vote in choosing the kind of legislation they want, subject to approval by Congress.

Family Farm Income Act

All of the bills carry the title "Family Farm Income Act of 1960" They have two primary objectives First, to strengthen the income and security of family farms and, second, to place principal responsibility for program development and financing on farmers rather than on the government

Under this proposal Congress would make available a number of alternative program methods, or combination of methods, which farmers would be permitted to use Among those would be establishment of marketing quotas or goals among the states, counties and producers

Others would include broader use of marketing agreements and orders, stabilization pools into which farmers would put their product for collective bargaining with buyers, such as the big chain stores, and compensatory payments such as those now in effect on wool and sugar

Step By Step Procedure

The first step toward development of a new program would be a request by an organization of producers for conference with the Secretary of Agriculture. If the Secretary agreed that a new program was needed he would call an election in which producers of the commodity would elect a nine-man committee of producers to develop a program.

When approved by, that committee the program would be submitted to the Secretary of Agriculture.. If it involved expenditure of more than $20,000,000 in any one year, the Secretary would refer it to the Senate and House Agriculture Committees.

If not disapproved within 90 days by either of those committees the program would be offered growers in a referendum if approved by two-thirds of those voting, it would become effective. If not, then the program already in effect before the referendum would continue.

The bills include two specific prohibitions. No payment

THE BIBLE SPEAKS

International Uniform Sunday School Lessons

BY DR. KENNETH J. FOREMAN

Bible Material: Acts 27.1 through 28.16.
Devotional Reading: Psalm 107:23-32.

Shipwreck

Lesson for March 20, 1960

"ALL these things are against me," said a down-hearted old man once. Even the young and strong get the feeling that certain kinds of things are against them. We all do, more or less. When bad weather sets in; when people won't take our advice; when we see trouble coming and have no way to stop it; when we are alone in the midst of strangers; when we've been in jail for two years; when we are the "low man on the totem pole;"—we feel these things are against us. We seldom think of them as open doors to opportunity.

Dr. Foreman

Situation Out Of Hand

When we are riding the situation, so to speak, when we are in the driver's seat and have everything well in hand; when things are happening because we ordered and arranged things that way; then we sing that everything's coming our way. But when the situation is not in hand, when every thing about the situation is either unexpected or unwanted and nothing good can be said about it, then we groan that everything is against us. Nothing is more depressing than a situation out of hand.

However, there was a remarkable Christian whose story is told in the book of Acts, who never would admit that everything was against him. He always knew God was for him, and that was the main point. Situations might get out of his hands but not out of God's hand. Consider Paul, one of a batch of prisoners aboard a grain-ship on a grey November day, bound across the Mediterranean to the empire's capital.

When he stepped on board he was already at the bottom of the heap. He had been two years in jail, he was then actually shackled with a chain, he was probably [illegible] good health, he had only [illegible] two friends with him, [illegible] were all prisoners, soldiers, sailors, a pretty rough crowd. [illegible] preacher. Not only that, [illegible] had given good advice (Don't [illegible] the stormy season is starting [illegible] had been turned down. Paul [illegible] an old Mediterranean hand [illegible] knew the weather signs. But [illegible] body paid him any mind. [illegible] came the storm and the [illegible] wreck. Read all about it in [illegible] It was a narrow squeak.

Little Man to Big Man

The point is, Paul never [illegible] minute wishing he were in a [illegible] situation. He never put in a [illegible] plaint that all these things [illegible] against him. He used the [illegible] tunity all these disasters gave [illegible] But he did not use it for [illegible] he used it for others. To be [illegible] he could not resist saying in [illegible] "I told you so." But he did not [illegible] with that. He became the [illegible] useful and most respected man [illegible] the ship. When they started [illegible] was just another prisoner, a [illegible] man in every sense; when [illegible] crash came he was the big [illegible] For one thing, he brought [illegible] to the others by his own [illegible] He talked language they could [illegible] understand Get something to [illegible] he said. And don't let anybody [illegible] the life-boat.

Always A Witness

Paul did preach, though he [illegible] not a man to let a chance [illegible] He preached by his very attitude [illegible] but he also gave witness in words [illegible] He said just why it was that [illegible] was so confident. His faith was [illegible] in himself nor in the ship's captain, it was in God Now it is [illegible] news that men pray in hurricanes [illegible] But it is news when men in hurricanes do not pray mostly for themselves There is a lovely touch [illegible] what Paul said to the other soldiers [illegible] men on the stormy deck. [illegible] angel of his dream had said to him [illegible] **"God has granted you all those who sail with you."** Paul thus [illegible] his fellow-passengers—even the [illegible] soldiers who had him in charge [illegible] the crew, everybody—thus [illegible] them as his own because God had [illegible] given them to him A man who [illegible] does not ask special favors [illegible] himself, a man who, if he is going [illegible] to be saved, wants others to be [illegible] rescued with him—a man like that [illegible] will get a hearing when he speaks [illegible] a good word for the God to whom [illegible] he belongs and whom he serves.

Now Is The Time . . .

BY MAX SMITH

MAX SMITH

TO INSPECT ELECTRICAL WIRING SYSTEM — A wiring system is no better than its poorest part, electricity plays a very important part in many homes and on many farms but even the best wiring system needs some attention. Frayed insulation, broken insulators, loose outlets or switches, and worn fixtures may cause serious damage to life and property Extreme caution should be used in not overloading a line; your local power company representative should be consulted when adding new appliances or motors

TO KEEP ROOTS MOIST — New trees, plants, or shrubs that arrive before ground conditions permit planting should be kept moist until planted For only a few days this might be done by keeping covered with peat moss, wet paper or cloth, or by immersing in a bucket of mud or moist sand. If the trees or plants are to be held for more than several days, they should be "heeled in" by digging a [illegible] trench and putting the plants in a single row, and covering with wet soil; they will hold in this manner for several weeks until planted.

TO KEEP FLOORS INSULATED — The barn floor above dairy barns should be either insulated with a commercial insulation, or be kept covered with straw, hay, corn fodder or other bedding material, to a depth of 6 to 8 inches. If this is not done, then condensation and dripping will result. This same practice is necessary in all farm buildings where much animal heat is present.

TO CHANGE RATIONS GRADUALLY — In all dairy and livestock feeding it is quite essential that any major change in the grain ration be done over a period of weeks rather than in a few days. With many animals the digestive system will be upset and bloating or scouring will result, while dairy cows in production abrupt changes may cause udder flare-ups and udder congestion. When changes are being made it is often best to reduce the amount of the mixing made so that it will last only a week and then the change can be gradually made toward the new mixture over a period of two or three weeks.

Fulton Grange
(From page 1)

A copy of the resolution will be sent to each of the legislators.

In the second of the two resolutions the grange labeled as unfair and unjust the action of the Borough of Quarryville in using a portion of the collected earned income tax for purposes other than school expenses The grange takes its stand on the grounds that since the entire Southern Lancaster County school district is operating as one integral unit, the action of Quarryville places undue burdens on the other portions of the district

In other action the grange appointed Kenneth McCauley and Mr. and Mrs. Joseph Sinclair, all of Drumore, as delegates to the conference on "Problems of youth to parents, school and community" to be held in the Quarryville Elementary School on March 28

During the literary program Robert McSparren presented a talk on some of the most commonly made errors on income tax returns.

The next meeting will feature a cake contest. Members are asked to bring cakes for three classes, white, chocal-

STAIRWAY LIGHTING FIXTURES

When selecting a ceiling fixture for near a stairway, be sure it has a closed top and fits close to the ceiling advises Sanna Black, Penn State home management extension specialist. With such a fixture, persons decending the stairway won't be forced to look directly into bare bulbs.

INSPECT WIRING

An electrical wiring system is no better than its poorest part, declares Joseph McCurdy, Penn State extension agricultural engineer. He urges periodic inspections of wiring extensions and the original system by a qualified person

This Week
(From page 4)

in excess of $10,000 shall be made to any one farmer in a year, and no provision could be included that would require the government to buy, lend on,, or store any agricultural commidity.

Arguments for the bill's are that such a program would (1) greatly reduce farm program costs, (2) halt the build-up of surplusese in government hands, and (3) make available to farmers many of the bargaining advantages given organized labor in the Wagner Act 25 years ago.

Farm Calendar

March 22 — 7 30 p m. — Rescheduled meeting for election of Southeastern Pennsylvania Artificial Breeders Cooperative at Hempfield Elementary School.

BURLING'S CHICKS
For Top Quality Eggs

Last fall, at NEPPCO, our egg quality was highest among all entries. These were hen eggs—after they had been laying 12 to 14 months. That's when Quality Eggs pay best.

At Bill Burling's you can find just what you want.

You have eight top strains and crosses to choose from. Our Sexlinks are very popular with nearby farmers.

Then there are the "pick" of the best strains and crosses for Broilers, or meat-and eggs.

One customer said our Carey Leghorns are: "Just wonderful birds to handle". That's important in high powered Leghorns.

Burling's Big 8

Carey's Famous Random Sample Test-winning Leghorns. A customer made a 270-egg. average on 1800 birds!

Merryknoll Sexlink (Rock x Red)—Bred by electronic "brain" methods.

Golden Sexlinks — Harco male x Andrews White Rock female. They're tough, and great layers.

Cobb's White Rocks — Broiler Test winners and good layers too.

Vantress x Cobb White Rocks — Popular for meat.

Garrison Cornish Male x Cobb White Rock female Super meat quality.

Gove's Barred Rocks Still a favorite of many farmers

Burling's New Hampshires. Carefully selected stock.

When you're ready to order, pick up the phone and call Oxford 286 collect.

Seed Packages Must Say 1960

HARRISBURG, — A warning to seed retailers was issued by the State Department of Agriculture recently.

"Seed packages being offered for sale this year must, for the first time, bear a statement such as "Packed for 1960' or the percentage of germination and the month and year in which the germination test was made" Dr. Thomas L. Guyton, director of the Bureau of Plant Industry, said today.

"This regulation applies to small seed packets for home and garden as well as for agricultural seeds," Dr. Guyton explained.

"Packages containing seed treated with a pestcide or any poisonous material must be marked as follows 'Treated seed Do not use for food, feed or oil purposes,' " Dr. Guyton said. "In the case of poisonous pesticides or any poisonous material, the label must bear a skull and cross bones and the word 'poison.' "

The germination provisions were added to the state seed laws because seed loses it power to germinate when stored for long periods under various conditions of temperature and humidity. Thus, old seed can be practically dead without this being apparent from external observation.

Much field and garden seed is now pre-treated against diseases, fungi and molds which are found in the soil.

Sales Results At Farm Auctions

Dairy cows brought prices ranging from $250 to $600 at farm auctions in the county this week and one outstanding purebred Holstein went to $800, according to Auctioneer Abe Diffenbach.

Hay at the same sales ranged from $23 to $36 per ton, straw $27 to $29.50 and corn $37.50 to $40.

Other supplies and equipment sold as follows: Tractors: Oliver 60-$300; Oliver 88—$1000; John Deere 420-$1750, cultivator for same—$180; John Deere 60—$2090 Allis Chalmers WD with cultivators—$950; Oliver 55—$1740.

Rubber tired wagons from $200 to $330; John Deere four row corn planter—$600; Oliver corn picker—$1000; New Holland Baler—$1120.

McDeering Disc Harrow—$310; John Deere disc harrows—$280 to $340; Cunningham hay conditioner—$575; John Deere hay conditioner—$500.

Milk cans—$5.50 to 11.00; milk coolers—$75 to one 200 gal. bulk milk $950.

Guernsey dairy cow om $175 to $510; Chi —50c to $1.75 per he

GROUND MEAT

Ground meat is a buy. Although it may higher priced than economy meat cuts, it no waste, point out State consumer econo specialists. A pound o ound meat makes four ings. When other ingre ts such as rice, spaghe vegetables are added t one pound makes five ings.

1960 EARLY BIRD REPLACEMENT PROGRAM

★ ECONOMY OF PROGRAM
Basis present feed costs you can grow Leghorn pullets to 20 weeks of age on a feed cost of 75 cents or LESS.

On the EARLY BIRD PROGRAM it takes about 19 pounds of feed or less to grow a Leghorn pullet to 20 weeks.

1. The Early Bird feed required on growing the 1958 Random Sample pullets for the Pennsylvania Egg Laying Contest was 19.1 pounds.
2. On the 1959 State contest pullets, feed required was 19.0 pounds.
3. Last year, on an Ephrata, R. D. 2 farm, 5,000 pullets were grown to 21 weeks on 18.9 pounds of feed.
4. Mr. Walter Ames of Narvon, Penna., raised 2,000 exceptionally fine pullets to 20 weeks of age on 17.32 pounds of feed.

★ ESTIMATE OF FEED REQUIRED
This 19 pounds of feed consists of approximately the following quantities.

★ CONFINEMENT PROGRAM

Early Bird Starter	2.0 pounds
Early Bird Grower	8.5 pounds
Oats	8.5 pounds
	19 pounds

★ RANGE PROGRAM

Early Bird Starter	2.0 pounds
Early Bird Growing Mash	6.8 pounds
Oats	10.2 pounds
	19 pounds

At present costs for feed in ton lots, this gives a feed cost per pullet of 75 cents using bagged feed.

SOME OF OUR CUSTOMERS HAVE GROWN PULLETS FOR AS LOW AS 65 CENTS FEED COSTS AT 20 TO 21 WEEKS OF AGE.

★ MANAGEMENT & DISEASE CONTROL PROGRAM
For details see our booklet on Management, available on request.

HAVE YOU WATCHED PULLET PLACEMENT FIGURES LATELY?
They are substantially lower all over the nation.
Perhaps it is better to start your replacements NOW rather than wait until everyone jumps on the bandwagon. If we can be helpful, please contact us.

"The Way The Twig Is Bent....!"

Remember:

Your FUTURE egg production costs and your flocks PERFORMANCE will be determined by the way you feed and manage your replacement stock NOW.

Don't be penny wise and pound foolish! Do it right!

For the Farm Wife and Family

Start The Day Right

by Mrs. Richard C. Spence

Many doctors and nutrition experts feel that breakfast is the most important meal of the day. You've just arisen from your longest fast; your energies will be called upon to accomplish the day's activities which lie before you. You need a reserve supply of those energies; and breakfast will give them to you Workers will attack their jobs with more vigor, children will be more alert and attentive in school, and weight watchers will find it much easier to stick to their diets, if they start the day with a good breakfast.

The ideal breakfast includes fruit; bread or cereal; egg meat, fish, or substitute; and milk—in other words, it should include something from each of the four major food groups

Here are just a few menu suggestions for a good breakfast for your family:

MENU NO. 1

Broiled Grapefruit

Shredded Cereal with cream
Egg Frizzle*
Whole wheat toast
Coffee or milk

EGG FRIZZLE

¼ pound chipped beef
4 teaspoons butter
4 eggs, beaten.
⅛ teaspoon pepper
¼ cup milk

Cook dried beef in butter until slightly crisp. Combine eggs, pepper and milk and mix well. Pour over beef and cook as for scrambled eggs. Serve garnished with sprigs of parsley. Serves 4.

MENU NO. 4

Stewed Dried Apricots
Cooked Wheat Cereal
Bran Muffins*
Coffee or Milk

BRAN MUFFINS

1½ cups sifted flour
1 teaspoon salt
1½ teaspoons baking soda
2½ cups bran
½ cup chopped raisins, dates, prunes or figs
2 eggs
½ cup sugar
¼ cup molasses
1½ cups sour milk or buttermilk
2½ tablespoons melted shortening

Sift flour, salt and soda together; add bran and raisins. Beat eggs; add sugar, molasses, sour milk and shortening. Add to dry ingredients all at once and stir only enough to dampen all the flour. Fill greased muffin pans ⅔ full and bake in hot oven (400 degrees) 25 minutes. Makes 1½ dozen.

Prunes in Orange Juice
Goldenrod Eggs*
Sausages
Butterscotch Pecan Rolls*
Coffee or Milk

GOLDENROD EGGS

4 hard-cooked eggs
1½ cups White Sauce
Toast

Chop the whites of eggs and add to the hot white sauce. Put yolks of eggs through a ricer. Pour sauce over hot toast and garnish with the yolks. Serve at once Serves 4.

BUTTERSCOTCH PECAN ROLLS

2 packages active dry yeast
½ cup warm water
1 cup milk
½ cup sugar
1½ teaspoons salt
5¾ cups sifted all purpose flour
¼ cup shortening, melted and cooled to lukewarm
2 eggs, unbeaten

Dissolve active dry yeast in warm water. Let stand. Scald milk. Add salt and ½ cup sugar. Stir well and cool to lukewarm. Stir yeast solution thoroughly and add to lukewarm milk mixture Add half the flour gradually and beat until smooth. Add shortening and eggs, beating well after each addition. Gradually add remaining flour and mix thoroughly. Turn out on lightly floured board and knead lightly. Place in greased bowl, cover and let rise in warm place until double in bulk.

Meanwhile, into each greased muffin well put ½ teaspoon butter and 1 teaspoon brown sugar. Arrange 3 or 4 pecan halves in each. When dough is light turn out onto floured board Cut in half and roll each piece into a rectangle (about 15x7x⅓"), Brush each rectangle with ⅛ cup melted butter; sprinkle with ⅓ cup light brown sugar. Roll each rectangle jelly roll fashion, sealing edges. Cut into 1 inch slices. Place slices cut side down in prepared muffin wells Cover and let rise in warm place until double in bulk Bake in moderate oven (375 degrees) 20 minutes Let rolls stand in pans 10 minutes before turning out Makes 48 rolls

COLD WATER DETERGENT WORKS BETTER ON DACRON

Cold water detergents seem to be more suitable for use in laundering Dacron than wool Effects of six cold water detergents on Dacron and wool were compared in recent tests Dacron showed less change than wool thru six launderings.

More shrinking and matting was evident on wool. Dacron did not wrinkle or stretch as it often does when hot water laundry methods are used The tests ranked the effects of the detergents on the whiteness and softness of both fibers as well as for shrinking, matting or stretching

White scarves of 100 per cent wool and 100 per cent Dacron were used for the tests The scarves were worn for two day periods by six different people. They were rotated from person to person after each laundering

Each scarf was laundered in 68 degree tap water—soaked, rinsed, rolled in a towel and fan dryed. The same detergent in amounts specified in the directions was used on the same scarf through the six launderings. After each laundering the scarves were measured for shrinkage Ten judges scored them at the end of the experiment for ness.

Today's farm popula 21 2 million in the U S pared with 25.1 mi 1950. Only 1 in 8 pe the United States lives farm compared with 1 in 1950 and 1 in 3 fifty ago. Since 1950, the farm population has de ed by 3 9 million, or 15 cent

plant AMERICA'S GREATEST HYBRIDS

astern States ales Almost 90 Million

The annual report of the stern States Farmers' Exange shows the volume business for 1959 was 9,955,130.

The report shows a busiss volume increase of ,852,080 over the previous ar The increase was due part, to the entry of the operative into the marketing field. An egg marketing co-op was organized in New England in the spring of 1959.

Patronage refunds, to be mailed later this spring will total $1,599,727 which is 1.89 percent of the patron purchases during the year. No patronage refund was earned on products marketed by the cooperative this year.

Feed and grain distribution accounted for 71 per cent of the volume of business; 13 per cent was in fertilizer and lime; seven per cent in farm supplies; four per cent in agricultural chemicals and five per cent in seeds

Trials with contract broiler growing show that the organization should not undertake this venture at this time except on a small scale in sections of Pennsylvania

Miss Milkmaid Needed
Dairymen Still Looking.

The search for a dairy farmer's daughter to represent Pennsylvania's giant dairy industry has been extended to March 31. The original deadline was March 15.

Purpose of the contest is to find a new Milkmaid to represent the state's 700 million dollar dairy industry in appearance on radio, television, parades, county fairs, and at other events. Miss Milkmaid is the state's June Dairy Month Hostess, and it is her task to tell Pennsylvanians of the important roles played by milk in earning millions of dollars for the local economy, and in providing a delicious energy food.

The winner of the final Milkmaid contest will receive prizes that last year included a complete wardrobe, a mink stole, hair styling, a charm school course, and many other beautiful gifts She will be given a chance to try for a $1,000 scholarship offered by the Pennsylvania Grocer's Association; and will take part in the American Dairy Princess contest in which dairy queens from all over America Vie

Candidates must be the daughter of a dairying family producing milk commercially in Pennsylvania; live in the state, be at least age 17, and not reach age 23 before June 30, 1960; have parent's or guardian's consent if under 21; be single; appear at the local contest; appear at state finals if selected as area finalist; and represent the state's dairy industry duirng June, 1960, and at other times until June 1961 if chosen Miss Milkmaid Former local and state winners are not eligible for the contest.

Girls interested in entering the Miss Molkmaid Contest must qualify with rules listed, and send their name to local County Agricultural Extension personnel or to "Milkmaid", 303 Telegraph Bldg., Harrisburg, Pa.

When March winds blow, watch those open doors, broken windows, and large cracks in the dairy barn. Drafts chill the udders of high-producing cows and mastitis may result.

● Extension Service

(From page 1)

and Richard Lefever, Quarryville R1.

Max Smith, County Agent announced the designation of two county farms as County Demonstration farms. The farm of Wade Groff, Lancaster R7 will be the dairy demonstration farm while the farm of Harold Frey, Marietta R1, will be the livestock demonstration farm.

These designated farms will be a place where extension service can demonstrate many of the recommendations made by the county office. "Don't expect to see any drastic changes in the farms." Smith said, "But over a period of 10 or15 years many of the more advanced recommendations should be put into effect."

Reports were also heard from other members of the extension staff.

Solitude is as needful to the imagination as society is wholesome for the character

Feed Company Opens New Plant

Construction of a new bulk feed station at Florin, Pa., is scheduled for completion by June 1, it was announced recently by S. R. Renaudette, vice-president in charge of manufacturing for Wirthmore Feeds Inc, Waltham Mass, and E. W. Stevens, head of the company's bulk feed department.

The new feed handling facilities are intended to provide for more economical and efficient distribution of poultry, dairy and livestock feeds by dealers in the area. It is expected that delivery service from the new bulk station will be available to distributors within a 50-mile radius of Florin.

Site of the new unit will be one block off route US 230, on the main line of the Pennsylvania Railroad. Of all steel construction, the station will make it possible to unload feeds from cars into bulk trucks dealer and farm deliv Eight steel bins provide lities for storing feeds future delivery.

Now in the design the new plant will be ricated at Muncy, Pa shipped to Florin for ion.

Grand opening of the facilities will be celeb with an Open House to June 1. The exact will be announced in future, it was announce Travis Johnson, District resentative.

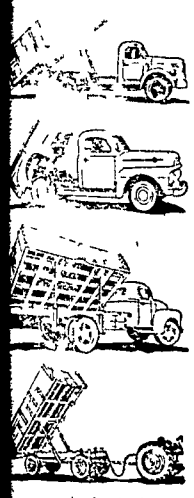
HARSH HYDRAULIC HOISTS



The 32 available models come to you with a wide range of lifting capacities ranging from 3½ to 20 tons for your truck, pickup, or trailer. The smooth, trouble free action of a HARSH HOIST has a fast lifting time of from 12 to 160 seconds, which allows more time for actual hauling.

These hoists come to you at an average cost of only 16¢ a day as compared to the $10-$15 a day you now spend to manually unload your truck.

To design and build a light weight, low-costing truck hoist suitable for all types of farm use, priced within the average farmer's budget was the aim of "Bud" Harsh when HYDRAULICS UNLIMITED MFG. CO. began operations. This hoist was built and is now in use throughout the nation.

The HARSH HYDRAULIC HOIST averages only $328 52 (including Federal excise tax) and maintains a low taxable weight which averages 273 lbs. These economical hoists are built for either back or side dumping, depending upon your need.

Save costly time and eliminate back-breaking labor by unloading with a HARSH HYDRAULIC HOIST engineered for economical, speedy, and durable farm use.
